

FE TECHNOLOGIES

Automatic Sorting Solutions

RFID that works.

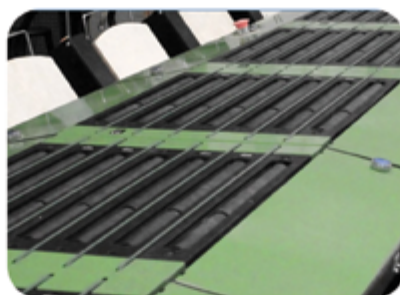

Featuring Lyngsoe Automated Materials Handling technology

FE Technologies is now partnering with world-renowned Danish materials handling experts, Lyngsoe Systems. Lyngsoe have installed their Automatic Sorters into over 300 sites worldwide, and FE Technologies itself has 8 years' experience in sorter installation and maintenance.

Together we can offer your library an Automatic Sorting Solution that delivers:

- Genuinely unattended operation – automatically checks in items and sorts them to a configurable destination
- Speedy operation at a world-leading 1500 items an hour
- Intuitive and innovative sorting software
- Range of modular installation options on a small footprint to fit in most library spaces
- Quiet, reliable, gentle on all library items

Patron Returns Options

A range of patron returns options are available including robust and intuitive indoor and outdoor touchscreens for one-at a-time returns; or vandal-resistant returns chutes for multiple item returns (to be paired with the Singulator). There is also a staff returns module to allow staff to pass items into the sorter from within the library.

Sorting Module

The SortMate 2000 uses a speedy yet gentle transport system to sort items into any number of sorting locations. The configurations and layouts are flexible and compact, so it will fit into nearly any library space. It has a huge capacity and sorts at 1500 items an hour. The SortMate2000 is quiet and has a low power consumption requiring very little maintenance.

Bin and Trolley Options

A range of ergonomic sorting bins, trolleys and carts are available to make taking the sorted items to shelf simple, speedy and safe. Choose from a basic spring-loaded bin to a complete cart-to-shelf trolley solution. The bins and trolleys are designed to be high capacity and work seamlessly with the SortMate2000.
