

Designer Clear Security Gates

FE TECHNOLOGIES *RFID that works.*

A subtle yet still visible LED alarm signal is triggered by items that have not been checked out.

The Designer Clear Security gates are the ideal security solution for libraries who need an aesthetically subtle security system that blends in with existing library architecture and interior design. These gates are made from high clear acrylic, so they are visually low-profile, blending into the background.

These gates provide libraries with the high performance you've come to expect from our products, including:

- 3-dimensional read range – highly effective read range and detection rate of all unsecured items no matter how they're held or hidden
- LED and audio alarm
- Alarm logs showing items that have alarmed the gates
- People Counter – a bi-directional people counter provides valuable reports on library traffic into and out of the library each hour, day, week and month
- Easy installation options, with no channel required for a single aisle configuration
- Multiple aisles can be "daisy-chained" from one power source

Technical Specifications

Tag compatibility - ISO 15693 supporting AFI and read multiple block command

Security Compatibility: EAS & AFI

Communication interface: Ethernet

Dimensions (one panel) 1782 x 556 x 45 mm (70.2 x 21.9 x 1.8 inches)

Base plate: 620 x 80 mm (24.4 x 3.1 inches)

- Excellent read range - the gates have a 3-dimensional read range, meaning tags can be identified in any orientation, providing a very high detection rate, along with the ability to detect multiple items at a time.
- Alarm log reports and people counter statistics - The Management console will display by title, any items that alarm the gate, and these can be accessed as reports at any time. People counter statistics provide valuable reports on library patronage patterns.
- Multiple installation options - available in any configuration up to 7 gate columns, the gates have a large range of installation options also, including underground cabling or above ground ramps.

FE TECHNOLOGIES
RFID that works.

We'd love to discuss library RFID and its benefits with you and your team. We can gladly set up a demonstration of our products at your premises, arrange a tour of our site, or a visit to one of our up and running RFID libraries.
